LAPCOM S All 100

SD card Large-capacity logging model with high-functionality

SD card slot

Large data capacity to SD card

Maximum 32G, 999 laps data storage is possible to a SD card.

Various data on clear Malti-display

RPM bar graph is displayed with all models. Time gap, gear position and other various data are available as standard.
* Backlight is optional.

Time gap with best lap or target lap

Gear position display

Supports multiple lap timing sensors

Magnetic sensor, sensitive magnetic sensor, or optical sensor is selectable.

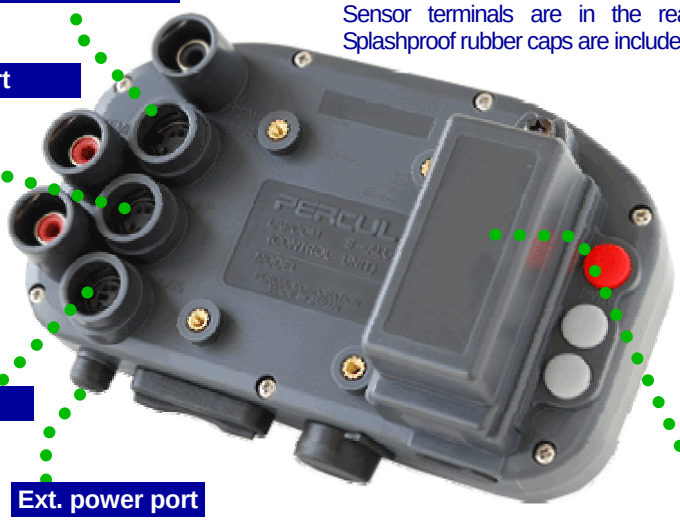

Multiple speed data acquisition

Like racing kart, in a vehicle where the engine is connected directly to the drive shaft, a speed sensor isn't needed by calculating from RPM.

Speed port

Lap port

Sensor terminals are in the rear. Splashproof rubber caps are included.

G port

Ext. power port

Ext. 12V power supply is available

The unit is equipped with the status lamp that can work with key switch or indicators. * This function is optional.

Lateral & Longitudinal G force

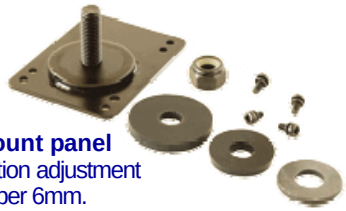

With an optional G sensor, Lateral and Longitudinal G, and line mapping are acquired for four-wheel cars.

Record Max 5 engines' running distance

Hour, trip, and odometer can be recorded for maximum 5 engines.

Compact one box unit

One box system makes installation and wiring easier. This model is most suitable for kart and mini-bike. With optional 2 types mount panels, it is easy to mount the unit on a vehicle.

T-type mount panel
4-step position adjustment is possible per 6mm.

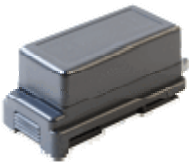

F-type mount panel

Detachable battery pack is capable of charging on the desk

With 60 min quick charging, max 10 hours continuous running time is possible.
* A tabletop battery charger is optional.
